

How to turn what you know into an income making business

Become a Children's Etiquette Teacher

More and more parents today are asking for etiquette classes for their children. To meet this demand for teachers, in April 2012 the **Executive School of Protocol** in Bermuda, will begin training individuals who are interested in teaching social skills and etiquette classes to children. It is our belief that all children should have the opportunity to benefit from etiquette education. By offering this course, we are able to reach far more children than we could ever serve if we tried to teach all of them ourselves.

Upon completion of this 5 day program, graduates will be fully qualified as Certified Children's Etiquette instructors. This is a fulfilling career for individuals who are interested in helping children reach their life potential through etiquette skills. It is also an excellent opportunity to discover the rewards of owning your own business. You will be prepared with materials and the knowledge of exactly what you will need to start your business of children's etiquette classes, summer camps or workshops, successfully.
